SUMMARY

I'm a value driven, service oriented front-end developer. Proficient in: HTML5, Javascript and CSS with a keen eye for design and usability (UX).

SKILLS

HTML5, Bootstrap, CSS, Javascript, React/Redux, Google Firebase/Store, Npm, GIT. Webpack, Babel

EDUCATION

B.S. Computer Science - Cal State East Bay, June 2017

- Golden Key Honors Society

React, Front To Back - Udemy, Nov 2018

React, Mastering Redux - Udemy, Feb 2019

Web design For Beginners - Udemy, Jan 2019

The Complete Javascript Course - Udemy, Jan 2020

COMPLETED PROJECTS

Client Management App - <https://reactclientpanel-4dba8.firebaseio.com>

Technologies used: React / Redux with Google Firebase/Firestore

Problem solved: Freelancers need to maintain a log of their clients and their debts.

Solution: The client management app solves this by providing an easy to use interface where all client data is stored for convenient balance tracking.

Budget App - <https://lizbeth58.github.io/budgetApp/>

Technologies used: HTML, CSS, Javascript

Problem solved: People need a way to keep track of their monthly budget!

Solution: The Budget app keeps track of all your monthly income and expenses

Forkify - <https://lizbeth58.github.io/forkify/>

Technologies used: MVC, ES6 Javascript, Webpack, Babel, HTML and CSS.

Problem solved: PCooking without a recipe can be hard!

Solution: Use forkify to find recipes, figure out how many ingredients per servings you need and save your favorite recipes

WORK EXPERIENCE

Marquee Salon | Receptionist | Oakland, CA August 28 - Current

- Answered phones with a patient attitude to attend to client needs.
- Scheduled appointments in accordance with stylist preferences while maintaining client needs and wants in mind.

LGBT Center | Volunteer- Software Teacher | Oakland, CA July 14 2019 - Current
